

API Setu

NeGD hosts a Webinar on API Setu- Enabling Seamless Digital Integration

The National e-Governance Division, Ministry of Electronics and Information Technology organised an interactive webinar on its unique service project API Setu on November 12, 2024 based on the theme 'Enabling Seamless Digital Integration'.

The webinar focused on generating awareness among the government officials, various departments, divisions and developers working on government websites and applications regarding the Government's initiative to streamline the API integration process for better experience for citizens and offer an open API platform to all.

The experts from NeGD lucidly explained in great detail about the many use cases of this initiative and also discussed on the significance of harnessing the power of different APIs and the need for building an interoperable digital platform to enable seamless service delivery across government departments.

Several viewers asked interesting questions such as how API Setu is transforming digital connectivity across India, how it enables greater interoperability in India's digital ecosystem, who all can sign up on this platform, and what is the process to make the best use of this initiative.

About API Setu

API Setu is a platform to discover high-quality APIs from a wide range of reputable sources, both government and private sector, through our platform. It provides consent based access to APIs for a variety of use cases such as KYC, Paperless Admission processes and employment.
